Introduction

The FTC takes in reports from consumers about problems they experience in the marketplace. The reports are stored in the Consumer Sentinel Network (Sentinel), a secure online database available only to law enforcement. While the FTC does not intervene in individual consumer disputes, its law enforcement partners – whether they are down the street, across the nation, or around the world – can use information in the database to spot trends, identify questionable business practices and targets, and enforce the law.

Since 1997, Sentinel has collected tens of millions of reports from consumers about fraud, identity theft, and other consumer protection topics. During 2017, Sentinel received nearly 2.7 million consumer reports, which the FTC has sorted into 30 top categories. The 2017 Consumer Sentinel Network Data Book (Sentinel Data Book) has a vibrant new look, and a lot more information about what consumers told us last year. You'll know more about how much money people lost in the aggregate, the median amount they paid, and what frauds were most costly. And you'll know much more about complaints of identity theft, fraud, and other types of problems in each state, too. The Sentinel Data Book is based on unverified reports filed by consumers. The data is not based on a consumer survey. Sentinel has a five-year data retention policy, with reports older than five years purged biannually.

In addition to taking consumer reports directly from people who call the FTC's call center or file online, Sentinel also includes complaints filed with other federal, state, local, and international law enforcement agencies, as well as other organizations, like the Council of Better Business Bureaus and Publishers Clearing House.

In 2017, the FTC was pleased to welcome the data contributions of the U.S. Postal Inspection Service and the Pennsylvania Attorney General's office. A full listing of data contributors is available in [Appendix A3](#) and [A4](#). Non-government organizations that contribute reports do not have access to Sentinel reports, as access is limited to law enforcement agencies.

For more information about the Consumer Sentinel Network, visit www.FTC.gov/Sentinel. Law enforcement personnel may join Sentinel at Register.ConsumerSentinel.gov.

Inside the Numbers

This year, the Sentinel Data Book refers to consumer reports rather than “complaints.” Often, people make these reports after they have experienced something problematic in the marketplace, avoided a loss, and decided to alert others.

Sentinel sorts consumer reports into 30 top categories. Appendices B1–B3 describe the categories, providing details, and three year figures. To reflect marketplace changes, new categories or subcategories are created or deleted over time. In 2017, a new subcategory for reports about online payment systems was added to the Internet Services category.

The Consumer Sentinel Network Data Book excludes the National Do Not Call Registry. A separate report about these complaint statistics is available at: www.ftc.gov/donotcall-databook2017. The Sentinel Data Book also excludes reports about unsolicited commercial email.

Consumers can report as much or as little detail as they wish when they file a report. For the Sentinel Data Book graphics, percentages are based on the total number of Sentinel fraud, identity theft, and other report types in 2017 in which consumers provided the information displayed on each chart.

Calculations of dollar amounts lost are based on reports in which consumers indicated they lost between \$1 and \$999,999. In prior years, rather than “amount lost” we labeled it as “amount paid,” which included values of \$0 to \$999,999.

States and Metropolitan Areas are ranked based on the number of reports per 100,000 population. State rankings are based on 2017 U.S. Census population estimates (Annual Estimates of the Resident Population: April 1, 2010 to July 1, 2017). Metropolitan Area rankings are based on 2016 U.S. Census population estimates (Annual Estimates of the Resident Population: April 1, 2010 to July 1, 2016).

This Sentinel Data Book identifies Metropolitan Areas (Metropolitan and Micropolitan Statistical Areas) with a population of 100,000 or more, except as noted for Wyoming. Metropolitan areas are defined by Office of Management and Budget Bulletin No. 15-01, “Revised Delineations of Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas, and Guidance on Uses of the Delineations of These Areas” (July 15, 2015).

Numbers change over time. The Sentinel Data Book sorts consumer reports by year, based on the date of the consumer's reported transaction. Some data contributors transfer their complaints to Sentinel after the end of the calendar year, and new data providers often contribute reports from prior years. As a result, the total number of reports for 2017 will likely change during the next few months, and totals from previous years may differ from prior Consumer Sentinel Network Data Books.

Executive Summary

Overview

During 2017, the Consumer Sentinel Network took in nearly 2.7 million reports, down slightly from 2016:

- Fraud: 1.1 million (42.54% of all reports)
- Identity theft: 371,000 (13.87%)
- Other: 1.2 million (43.59%)

There are fewer debt collection reports in 2017 (23% of all reports) but it is still the top category. Identity theft (14%) and imposter scams (13%) round out the top three reports to Sentinel.

Fraud

There were nearly 348,000 imposter scam reports to Sentinel. One in five of those also reported a dollar loss, totaling \$328 million lost to imposter scams. These scams include, for example, people falsely claiming to be with the government, a relative in distress, a well-known business, or a technical support expert, to get a consumer's money.

Of the 1.1 million fraud reports, 21% indicated money was lost. In 2017, people reported losing nearly \$905 million to fraud – an increase of \$63 million over what consumers reported losing in 2016.

The median loss for all fraud reports in 2017 is \$429. The median losses were highest in these fraud categories:

- Travel, Vacations and Timeshare Plans	\$1,710
- Mortgage Foreclosure Relief and Debt Management	\$1,200
- Business and Job Opportunities	\$1,063

Telephone was the method of contact for 70% of fraud reports with a contact method identified. Only nine percent of those people reported losing money to the scammer – but that 9% reported an aggregate loss of \$290 million, and a \$720 median loss.

Wire transfers continue to be the most frequently-reported payment method for fraud, with a reported loss of \$333 million.

Of people who reported their age, those aged 20-29 reported losing money to fraud in 40% of reports filed with the FTC, while people aged 70 and older reported losing money in just 18% of their complaints. But when they did experience a loss, people aged 70 and older reported much higher median losses than any other age group.

Identity Theft

Credit card fraud tops the list of identity theft reports in 2017. The FTC received more than 133,000 reports from people who said their information was misused on an existing account or to open a new credit card account.

Military

Military consumers filed nearly 114,000 reports in 2017. Of these, more than 50,000 were fraud reports, including 29,859 reports about imposter scams that cost them nearly \$26 million. Identity theft (30,184) was the largest single category of reports from military consumers.

Top States

The states with the highest per capita rates of fraud reports in 2017 were Florida, Georgia, Nevada, Delaware, and Michigan. For identity theft, the top states in 2017 were Michigan, Florida, California, Maryland, and Nevada.

Appendix A1: The Consumer Sentinel Network

Consumer Sentinel Network

The Consumer Sentinel Network is a free, online database of consumer reports available only to law enforcement. It includes reports about identity theft, fraud, financial transactions, debt collection, and credit reports, among other subjects. The Consumer Sentinel Network is based on the premise that sharing information can make law enforcement even more effective. To that end, the Consumer Sentinel Network provides law enforcement members with access to consumer reports provided directly to the FTC, as well as to reports shared by other data contributors.

IdentityTheft.gov

[IdentityTheft.gov](https://www.identitytheft.gov) is the federal government's one-stop resource for identity theft victims. People can use IdentityTheft.gov to report identity theft to the Federal Trade Commission and get a step-by-step personal recovery plan. The site will also create an Identity Theft Report victims can use to clear their credit files of fraudulent information resulting from the identity theft. IdentityTheft.gov has detailed advice for more than 30 types of identity theft, and also is available in Spanish at [Robodelidentidad.gov](https://www.robodelidentidad.gov). When people use IdentityTheft.gov, their report becomes part of the Consumer Sentinel Network database and is available to the Network's law enforcement members.

Econsumer.gov

[Econsumer.gov](https://www.econsumer.gov) was created in April 2001 to gather and share cross-border e-commerce reports, to respond to the challenges of multinational internet fraud, and to improve consumer confidence in e-commerce. Today, consumer protection agencies in 36 countries participate in econsumer.gov. Through econsumer.gov, consumers can file cross-border consumer reports online and learn other steps to take to combat fraud. The website is available in English, French, German, Japanese, Korean, Polish, Spanish, and Turkish. The reports into econsumer.gov are accessible to Consumer Sentinel members and certified foreign law enforcement agencies.

Appendix B1: Descriptions of Report Categories

Fraud Report Categories

Advance Payments for Credit Services:

The promise of a loan or credit card that requires you to pay a fee first; worthless credit card loss protection and insurance programs; the promise that accurate negative information can be removed from your credit file for a fee; services offering to recover government refunds or unclaimed funds; etc.

Business and Job Opportunities:

Franchise or business opportunities (e.g., offers to start a new business); work-at-home plans, (e.g., stuffing envelopes or processing medical claims); multi-level marketing schemes, employment agencies or job counseling, overseas work, inventions or idea promotions.

Buyers' Clubs:

Free trials or discounts on products and services. A buyers' club membership becomes a fraud when someone is billed for "memberships" they did not agree to. People can be offered a free trial but automatically enrolled and charged fees once the free trial period is over.

Charitable Solicitations:

Misleading pitches for donations to benefit a charity; solicitations for bogus charity or relief organizations; etc.

Foreign Money Offers and Counterfeit Check Scams:

Letters or e-mails promising a percentage of millions of dollars that from a foreign country in return for money, bank account numbers or other identifying information from the victim; fraudulent schemes involving foreign lotteries, mystery shoppers or internet purchases\classified ads in which someone is overpaid with a counterfeit check and asked to wire back the difference immediately after check deposit, leaving the victim responsible for the funds withdrawn; etc.

Grants:

Businesses or individuals marketing either government grant opportunities or financial aid assistance services; problems with student loan processors, debt collectors collecting on defaulted student loans, diploma mills and other unaccredited educational institutions; etc.

Health Care:

Fraudulent, misleading or deceptive claims for: vision correction procedures; dietary supplements; weight loss products or services; impotency treatments; health spas and equipments; infertility services; sunscreens; HIV test kits; medical discount plans; as well as complaints about over-the-counter or prescription drugs; other medical products, supplies or treatments; etc.

Imposter Scams:

Someone pretends to be a trusted person to get consumers to send money or give personal information. Examples include scammers claiming to work for or be affiliated with a government agency; scammers posing as a friend or relative with an emergency need for money; scammers posing as a romantic interest; scammers claiming to be a computer technician offering technical support; and scammers claiming to be affiliated with a private entity (e.g., a charity or company).

Internet Auction:

Non-delivery or late delivery of goods; delivery of goods that are less valuable than advertised; failure to disclose all the relevant information about the product or terms of the sale; etc.

Internet Services:

Problems with trial offers from Internet Service Providers ("ISPs"); difficulty canceling an ISP account; issues with Internet entertainment services, Internet gaming and social networking services; undisclosed charges; website design and hosting services; spyware, adware and malware issues; general reports about information or functionality related to websites; etc.

Certain Fraud categories are comprised of subcategories that fall in both Fraud and Other report types. See Appendix B3. The Fraud rankings exclude subcategories that are not fraud.
